# AGIL™ Smart Lighting

ST Engineering's award-winning AGIL Smart Lighting Solution has been honoured with numerous awards and accolades, in recognition for its technology innovation and sustainable contribution to smart cities of the future. Our IoT-enabled smart lighting boosts higher energy and cost efficiencies, simultaneously collecting traffic data for further analytics to derive higher order insights while enhancing the safety and convenience to users.

In 2018, the solution was awarded the Prestigious Engineering Achievement Award by The Institution of Engineers, Singapore (IES). This year, AGIL Smart Lighting for Public Housing Estates was recognised as the Winner of the IDC's Smart City Asia Pacific Awards 2020 under Smart Building & Smart Tech Parks category and successively won the prestigious HDB Quality Partners Award 2020 for Best Technological Partner.

The awards and accolades we have received reflect our continued pursuit of excellence in technological advancement, service delivery, and improved customer experience. Through our vision of preparing cities for a smarter future, we continue to empower people and organisations to solve challenges and enable a better place to live, work and play.
